

F3

Age:32

City: Sandton, Johannesburg

Gender: Female

Ethnicity: Indian

She holds a BSc in Information Technology and a Master of Computer Applications, bringing 8 years of expertise in front-end development, with a focus on Angular, TypeScript, and Node.js for full-stack projects. She has a proven track record in developing applications across various sectors, including healthcare, insurance, banking, real estate, and finance.

Her experience encompasses enterprise-level development, new project initiatives, modifications, and enhancements for both desktop and web applications. She is proficient in SPA and RESTful API design and third-party integrations. Additionally, she has 2 years of experience as a Front-End Development Lead, successfully managing teams of up to 7 developers. Her responsibilities included mentoring, overseeing deliverables, integrating backend APIs with the front end, and liaising with stakeholders.

Her specialization in UI technologies spans several domains, such as banking, healthcare, real estate, automobile, finance, and supply chain management. She is adept at handling various project phases, from requirement gathering and analysis to design, development, unit testing, and deployment of web-based and mobile applications. She has successfully led Proof of Concept (POC) initiatives for mobile applications and has experience with high-availability, scalable, and distributed architectures.

She is well-versed in Agile and SDLC methodologies, adapting to each project's needs. She has received written commendations from clients for her positive attitude, unwavering dedication, innovative problem-solving, and consistently high-quality deliverables. Notably, she played a key role in migrating applications from Angular 12 to 16, enhancing functionality and user experience. She has extensive experience working in Scrum and Agile environments.

Work History

Position: Senior Frontend Developer /Team Lead

Duration: 2024 to Current

Company: Banking and Financial sector.

- Developing a dual service application, managing a team of Full Stack developers, teaching them how to integrate from back to front end API's.
- Managing deliverables and communicating with stakeholders on project statuses.
- Proficient in the end-to-end software development lifecycle, from requirement gathering to deployment, ensuring high-quality web and mobile applications.
- Collaborated closely with cross-functional teams to understand business requirements and translate them into technical solutions.
- Leveraged expertise in the latest UI technologies and frameworks to enhance user experience and drive innovation.
- Actively participated in code reviews, providing constructive feedback to peers and promoting best practices.

Project 1: Investment Banking Division

- The company's deal services offer strategic advisory and execution expertise across M&A, capital markets, and project finance, tailored to diverse client needs.
- Specializing in debt restructuring, structured finance, and sector-specific insights, they provide innovative solutions for clients navigating complex financial landscapes.
- Trusted for their client-centric approach and extensive African presence, they deliver top-tier financial advisory services to drive value and success.
- Team size: 6

Technologies:

- Agile
- Angular 16
- HTML5
- CSS 3
- Bootstrap
- RESTful APIs Integration
- State Management (ngrx)
- Jasmine, Karma
- Visual studio
- JIRA
- Git
- Bitbucket

Reason for leaving:

- It's a fixed term contract till August 2024, and although it might be renewed, she would be interested in a permanent Front end Team lead role.

Position: Senior Frontend Developer

Duration: 2022 to 2024
