

J2

Age:28

City: Roodepoort

Gender: Male

Ethnicity: African

He is a Full stack developer with 8 years of hands-on programming experience. He has 7 years of expertise in Java Core and Java Spring. He excels with languages such as C#, CSS, HTML and SQL. He has also used JavaScript, Typescript, AngularJS, NodeJS, jQuery and Bootstrap. He participates in fully agile scrum deliveries and is proficient with the code version tool Github.

Furthermore, he has developed customer information systems as well as an automated recon application. He has automation development experience and has done mostly maintenance and enhancements on existing software as there has been no need to create software from scratch in his role. He has expertise in the full development life cycle as well as the familiarity with cloud services such as AWS and Azure.
