DevOps Eng 5
Age: 32

City: Pretoria
Gender: Male
Ethnicity: African

He holds a BSc in Mathematical Science and boasts nearly 7 years of diverse IT experience, initially specializing in Mobile Applications development and Systems Analysis. His skill set encompasses design, development, implementation, and Android development using C#, Xamarin IDE, and extensive work with Xmas files for user interfaces.

Transitioning into DevOps, which he now considers his forte and passion, he has accumulated 4 years of experience as a DevOps engineer. He was instrumental in resolving pipeline issues within ABSA, where he automated processes and implemented DevOps practices, resulting in the establishment of a comprehensive Continuous Integration and Continuous Deployment (CICD) system. Presently, he primarily focuses on pipeline maintenance and monitoring for optimal performance.

His expertise extends to Azure DevOps, including integration with third-party systems utilizing tools like JIRA. His project portfolio includes contributions to mobile web applications and personal web projects employing Kubernetes. Proficient in managing elastic containers and utilizing monitoring tools akin to Datadog, he's adept at employing various monitoring applications such as Googlepains, App Dynamics, and App Centre to track issues and facilitate team collaboration.

On a daily basis, he utilizes Azure DevOps to develop, maintain, and manage build and release pipelines. He demonstrates proficiency in Docker and Kubernetes, leveraging these tools regularly in his workflow.

Work History

Position: Mobile Application Developer & DevOps Build Master (CI / CD)   **Duration:** 2020 to Current
Company: Security sector outsourced to ABSA
- Implement UI for Xamarin forms for as per reequipment.
- Bug fix on Absa Africa Main banking app.
- Created and maintain the CI/CD pipeline.
- Integrate App Center and Monitoring tool.
- Created and Maintain builds release script for Automation Customization of the release branches.
