C4

Age:32
City: Edenvale, Johannesburg
Gender: Male
Ethnicity: African

He completed a Bachelor Degree of Technology in Information and has almost 8 years' experience as a Full Stack developer using mostly the MS technology stack. His strength is back-end development, but he has become more accustomed to front end in recent years.

The main technologies he's used include:

- C#
- .net
- .net core
- ASP.net
- HTML
- CSS
- K2
- JavaScript
- JQuery
- TypeScript
- Angular
- Mongo DB
- React
- Web Services
- Entity framework
- MS SQL Server
- PostGres
- Stored procedures
- Triggers

He also has experience with 3rd party system integrations, and RESTFull API integrations. As a software developer as part of his duties he deals with a lot of data, monitoring and ensuring all data is flowing from input to outputs, checking pipelines on DevOps from one server to another on production servers, checking security and liability of code, and this is the experience he gained in site reliability.

Work History

Position: Software Developer   **Duration: 2023 to Current**
Company: Logistics and Courier sector
One of the leading courier companies in SA.

- Responsible for full stack development using the technologies below.
