Work History

Position: Software Tester   **Duration: 2024 to Current**
Company: IT sector (Fixed Term Contract)
- Prepare and execute test cases and test packs.
- Link test cases to the requirement to complete the traceability matric.
- Preparation of Test data.
- Testing of new application.
- Log issues encountered for resolution.
- Liaise with project manager and development team in terms of testing progress.
- Provide test assistance is UAT sessions.

Reason for leaving:
- It's a fixed term contract while she is searching for a full-time job more aligned with her last permanent salary.

Position: Test Analyst
Company: Bank
Reason for leaving:
- She resigned from her previous company where she worked for 5 years after signing an offer for a permanent role at a bank as a Test analyst, and she was supposed to start working on 1 December 2023, however 2 weeks before her start dates the company informed her that they have frozen all their jobs including the role she accepted.
- She had already served her notice period at her previous company and was waiting to start at this company.
- Her previous company had already replaced her role with another resource and could not take her back.
- This left her in a difficult position, and she approached her previous employer from 2018, where she was a Contractor previously and they offered her another fixed term contract as they were satisfied with her performance, and she left on a good note.

Position: **Test Analyst**   **Duration:** **2018 to 2023**
Company: **Financial Services sector**
- Analyze Business Requirements.
- Working with the BA and Dev team to ensure QA efforts.
